

Dr. Jan V. Raiman invites you

7th INTERNATIONAL
ORTHODONTIC
SYMPOSIUM

1. Advent in Prague 26th – 28th November 2009

The Midfacial Region Contemporary Diagnostics and Modern Treatment

President: Prof. Dr. Ralf J. Radlanski, Charité Berlin

After a series of successful symposia in Prague the International Orthodontic Symposium (IOS) will cover a very special and highly relevant aspect of orthodontics this year: the Class III-Malocclusions. As every year, the scientific board has invited a number of outstanding international speakers, who want to share their knowledge to extend the scope and the diversity of treatment methods.

There will be a pre-course by Dr. Derek Mahony from Sydney covering surgical aspects of orthodontic treatment of Angle-Class-III-malocclusions, there will be presentations about new aspects of Cone Beam Computed Tomography (CBCT), about cephalometric diagnostics, including 3D-diagnostics and about the development of the maxillary region. And there will be enough time to discuss the presented diagnostic approaches and treatment methods in depth, together with colleagues and friends.

Pre-course Thursday, 26th November 2009

Dr. Derek Mahony, Sydney-Australia

Angle Class III with surgical and postsurgical complications, border of decompensation

Symposium Friday, 27th – Saturday, 28th November 2009

Dr. Axel Berens, Hanover-Germany

Avoiding complications in combined surgical and orthodontic treatment of Class III patients

Prof. Dr. Axel Bumann, Berlin-Germany, Los Angeles-USA

Cone Beam Computed Tomography (CBCT) – Diagnostic milestone in orthodontics and general dentistry

Dr. Thorsten Brandt, Wiesbaden-Germany

Cephalometrics in the Magnetic Field: 3D-diagnostics for Class III treatment

Dr. Karin Habersack, Munich-Germany

Clinical Management of Rapid Palatal Expansion (RPE) in Class III

Dr. Petra Hofmanová, Prague-Czech Republic

Applications of Cone Beam CT in Orthodontics

Niels Hulsink, Waalwijk-Netherlands

Myofunctional Influence on the Facial Growth in the First, the Mixed and Permanent Dentition

Prof. Dr. Christopher J. Lux, Heidelberg-Germany

The function regulator in the treatment of Class III malocclusion – Basic concept and clinical implications

Prof. Dr. Ralf J. Radlanski, Berlin-Germany

The Development of The Maxilla and Therapeutic Aspects of Class-III-Malocclusions

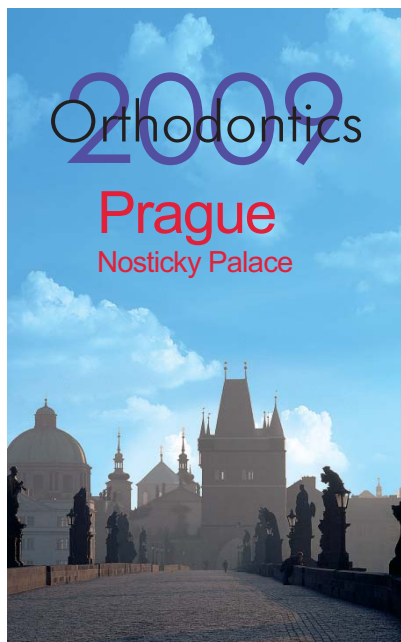

Dr. Benedict Wilmes, Düsseldorf-Germany

Rapid Palatal Expansion (RPE) and tooth movement in the maxilla by maximum anchorage control –New ways and approaches by the Benefit Technique

Dr. Heinz Winsauer, Bregenz-Austria

Midfacial development in adolescent Class III patients

Lengthening the dental arch by distalizing molars with the TopJet Distalizer
