

The Phantom Lingual Concept

Phantom selfligating directbond lingual brackets in the Örtendahl concept:

The development of a selfligating, interactive, transparent, polymer lingual bracket and corresponding arch wires.

A presentation of the unique direct bonding procedure and its benefits in relation to indirect technique.

A Hands-on bonding course on typodonts and wire insertion

By

Dr Thomas W Örtendahl

Gothenburg, Sweden

14th March, 2009, Saturday

- ✚ 9 am - 10.30 am :
 - The development of a labial selfligating interactive transparent co-polymer bracket and aesthetic arch wires into the Phantom lingual system. Product presentation and direct bonding procedure.
- ✚ 10.30 am – 11.00am :
 - coffee Break
